SUMMARY

Analytical and detail-oriented Data Analyst with a foundation in Python, SQL, Power BI, MS Office, and advanced Excel. Skilled in data cleaning, processing, visualization, and reporting to generate actionable insights and support data-driven decisions. Experienced in managing datasets, optimizing workflows, and collaborating with cross-functional teams to drive operational efficiency.

EXPERIENCE

GET — Electrical & Electronics Maintenance — Bharat Forge Limited

Pune, India

- Worked across automation, passenger car line, and robotics line automation systems at Bharat Forge.
- Performed preventive maintenance (PM) and troubleshooting on FANUC robots to ensure line uptime.
- Managed and processed structured and unstructured data with high accuracy and consistency.
- Performed data cleaning, validation, and quality checks to maintain data integrity.
- Generated and automated reports using advanced MS Excel features, including filters and sorting.
- Maintained documentation and version control while collaborating with cross-functional teams.

Data Analyst — TAN Engineers

Pune, India

- Performed data analysis using Excel to support production and maintenance reporting.
- Created MIS reports and Power BI dashboards to track performance metrics.
- Carried out data cleaning, validation, and visualization for operational data.
- Tracked KPIs and conducted performance analysis to support decision-making.

PROJECTS

Data Visualization in Power BI — *Tools: Power BI, Excel*

- Developed a Zomato data analysis dashboard using Power BI.
- Transformed raw data into interactive, visually appealing reports.
- Analyzed restaurant locations, ratings, and cuisines using Zomato API data.
- Created dynamic map visualizations to display geographical insights.

Smart Dustbin: AI Audio Classifier — *Tools: Power BI, Excel, SQL, AI*

- Developed an AI-based audio classifier for automated waste segregation using deep learning.
- Integrated the classifier into a smart recycle bin for automatic material sorting.
- Designed a user-friendly interface with real-time classification feedback to improve usability.

EDUCATION

BE in Electronics & Telecommunication Engineering *Jun 2024*
Sinhgad Institute of Technology & Science — SGPA: 6.55

Diploma in Electronics & Telecommunication Engineering *Aug 2021*
Sou Venutai Chavan Polytechnic, Pune — Percentage: 85.12%

TECHNICAL SKILLS

- Programming Languages: Python (Pursuing IIT Bombay Certification for the same)
- Databases: MySQL / SQL (foundational)
- Pursuing Data Science with AI course (Power BI, Probability & Statistics, Machine Learning, Deep Learning, Artificial Intelligence)
